Black Box Defect Log for Testify

Team 6

Seth Cook
Margarita Lee Li
Samuel Marshall
Adam Rice
Mitchell Stendal
John Vall

User to Student Client Interaction:

Defect #	Defect	Severity
1	Open test application has its name changed to "Exit Test".	S2
2	Click once on "exit test" will do nothing.	S2
3	Once test has been completed, the user is given the option to open another test, but clicking this button does not open a file selection window.	S2
4	When a student opens a test file, the test does not open to question 1 (seems to like going to question 3)	S2
5	Question 1 of a opened exam is not accessible to the student	S1
6	Once a student has used the "Next" button to advance to the last question in the exam the button is changed to say "Submit". Using the previous button will not change this and there is then no way to advance through to subsequent questions.	S2
7	Opening a test file required the student to click the "Exit Test" button twice	S3
8	Possible Points on exams are listed incorrectly as 25 regardless of the point values that were originally assigned to the questions	S2
9	Next button should not appear until a test has been open.	S3
10	Previous button should not appear until a test has been open.	S3
11	The prompts and answers get switched around	S1

	when a student opens a test.	
12	When the edit test functionality is accessed, opening an existing file will result in the last test question showing up as blank, and un-selectable through the dropdown, but can still be viewed through use of next and previous buttons	S2

User to Instructor Client Interaction:

Defect #	Defect	Severity
	Home Screen	
1	Selecting "Grade Test" from the instructor client start screen launches the "Create Test" window	S2
2	Selecting "Create Test" open a file open dialogue box, however upon selecting cancel, the "Create Test" window is launched	S2
3	Selecting "Edit Test" from the instructor client start screen launches the "Grade Test" window	S2
	Create Test Window	
4	The user is not able to save the test as selection of "Save" and "Save as" do not prompt the user to save the file to disk	S1
5	Adding a new option to a multiple choice question will erroneously add the newly created choice twice	S2
6	Navigation between created test questions using the Previous and Next buttons has been reversed	S3
7	Fields unused by the different question types are properly greyed out, but still show the data that pertained to the previous question (File and	S3

	Language)	
8	Deleting a question will properly shift the questions following the deleted question up one position, but the question selection drop down will still erroneously show the old number of questions with the last item now incapable of being selected	S3
9	The prompt and answer fields are not greyed out before the user has selected new question	S3
10	The answer to short answer questions are not persistent	S2
	Edit Test Window	
11	When the user opens an existing file, the "Points Possible" field appears to not be stored or retrieved properly. Upon setting in for question one (which is required before viewing other questions), all subsequent questions do not appear to have this newly set possible points value	S1
12	The answers to short answer questions are not properly saved to the output file	S1
13	In drop down menu "Test", properties button doesn't do anything when clicked sometimes. Sometimes it works.	S2
14	When the prompt is entered for the first question it is copied to the last questions prompt as well.	S3
15	If you try to advance to the next question without entering a prompt or answer a dialog box comes up informing you that you must enter a value into those fields, which is correct. But it then advances you to the next question regardless.	S2
16	When the properties window is opened apply	S3

	must be clicked twice to close it.	
17	Every time a new multiple choice answer is added it makes sure there is a duplicate of every answer before. If there is not it makes one.	S3
18	If you make a new test while there are multiple choice options in populating the multiple choice field they are copied over to the new test.	S3
19	In order to open a test file after the student has entered their username and password, the "Exit Test" button must be selected to open the file selection dialog box	S3
20	In the Test Properties dialog box , clicking "Cancel" does not close the box.	S2
21	In the Test Properties dialog box, the initial start time is set to 0:00am	S3
22	In the Test Properties dialog box, anything can be added into Start/End time textboxes, even non-numerical values	S1
23	In the Test Properties dialog box, clicking "Apply" doesn't do anything but reset the form values	S1
24	In the Test Properties dialog box, clicking the "X" in the corner will simply open a new test properties box after closing the original one.	S3
25	Opening an existing file will result in the last test question showing up as blank, and un-selectable through the dropdown, but can still be viewed through use of next and previous buttons	S2
26	When the instructor selects "Question -> Delete" from the top drop-down menu after working on a Multiple Choice problem, the answer choices are not cleared, even though the buttons are made	S3

	unclickable.	
	Grade Test Window	
27	Language label simply appears as "jabel3"	S3
28	Open key in file menu does not report an error when any other invalid file is opened, just does nothing	S2
29	Open Student Exam in file menu does not report an error when any other invalid file is opened, just does nothing	S2
30	Clicking "Show Summary" button does not do anything	S2
31	The Exit option in the file menu does not exit; it simply does nothing.	S2
